

Simplicity VoIP...Making Your Transition to VoIP – Easy as 1,2,3

Simplicity VoIP National Scope of Coverage

Simplicity VoIP's goal is to make it easy for all sized businesses to access the power of the cloud - focusing on features, functions and service. Simplicity VoIP is built on several client-centric core values, a custom-engineered solution being the first. With this in mind, clients have options for VoIP features, pricing and equipment acquisition. Transparency is another core value – there are no surprises in monthly bills. As a result, Simplicity VoIP's retention rate stands at 98%.

Industries Served:

- Broadcasting
- Construction
- Consulting
- Education
- Financial
- Healthcare
- Human Resources
- Insurance
- Legal
- Non-profit
- Real Estate
- Recreation / Entertainment
- Retail

Our Story

Based in Richmond, VA, Simplicity VoIP was founded in 2012 by Ben Humphreys, CEO of the telecom-technology consulting agency Comtel Communications, in response to a service delivery gap in the hosted VoIP and cloud communications market. Simplicity VoIP now answers the need for a business communications solution with advanced functionality, and a managed hands-on deployment strategy.

Our Difference: A five-star, client-centric design-to-provisioning process:

- A welcome call to confirm aspects of your custom-engineered phone system, followed by extensive project management
- An on-site survey to verify infrastructure specifications
- On-site delivery of installation and user training

Why Choose Simplicity VoIP?

ON CALL

Local and national resources allow for quick deployment of technicians to support your business.

PROCESS

Our three-step process assures that your VoIP installation goes smoothly.

TEAM

Our dedicated team works for you. With 125+ years of expertise, we are ready 24/7/365 to offer support.

PRICING OPTIONS

You have options - service plan and equipment acquisition - to manage your business communications costs.

ON-SITE DELIVERY & TRAINING

We're on-site to assess your infrastructure and for the port and installation process. On-site training is provided to get you ready to use your new phone system.

GEO-REDUNDANT (NETWORK)

Our dual servers and geo-redundant data centers are designed and regularly tested to ensure 100% platform uptime and continuous service.

FEATURE RICH UNIFIED COMMUNICATIONS

150+ feature rich options provide a full UC experience; supporting all your business needs.

PORTAL

Access to analytics and phone system management via a user-friendly portal provide the tools to run your business, in real-time.

TRANSPARENCY

No surprises - terms and conditions are clearly communicated.

Products & Services:

- Business Phone Systems
- UCaaS
- Call Center
- Video Conferencing
- SIP Trunking
- Internet Connectivity
- Phones & Equipment
- Audio Recording
- Managed Services
- Simplicity Fax

Customized Solutions:

Features & Functionality

With 150+ features on our Class 5 VoIP platform, we design the optimal solution for your business's needs. A thorough analysis of your goals ensures the best delivery of functionality for your company.

Pricing:

Our three pricing options: unlimited seat, call path/extension (unlimited or metered) - ensure the best choices for ideal coverage and usage requirements for your business.

Equipment Acquisition:

If you prefer to acquire equipment as an outright purchase (capital expense) or to rent (operating expense), we have options that fit your budget.
