

5 Steps to Easy Deployment

Adding SIP trunks to your existing PBX system is fast and hassle-free.

Follow the 5 steps below and you can be up and running in no more than 2 business days.*

- 1 Confirm that your PBX is SIP capable**
- 2 Determine number of SIP trunks needed**
- 3 Decide if you want new phone numbers or wish to port existing numbers***
- 4 Contact SIP provider for a quote and projected deployment date**
- 5 Execute SIP agreement**

*If porting existing number, standard porting intervals apply.
