

SIP Trunking

5 Easy Steps for Deployment

Adding SIP trunks to your existing PBX system is fast and hassle-free. Follow the 5 steps below and you can be up and running in no more than 2 business days.*

- Step 1** Confirm that your PBX is SIP capable
- Step 2** Determine number of SIP trunks needed
- Step 3** Decide if you want new phone numbers or wish to port existing numbers*
- Step 4** Contact SIP provider for a quote and projected deployment date or **Click Here**
- Step 5** Execute SIP agreement

*If porting existing number, standard porting intervals apply.
